Movement: The Most Advanced Supply Chain Visibility Platform

The global supply chain is facing unprecedented challenges. LSPs, shippers, and carriers are battling labor shortages, supply chain disruptions, infrastructure bottlenecks, and limited capacity across all transportation modes. project44 is solving these problems with a data platform that serves as the connective tissue for supply chains, enabling any company invested in moving goods across the globe to exceed ever-higher customer expectations and be agile in the face of disruptions.

The project44 Solution

project44 takes a data-first approach to visibility with a platform designed to ingest, cleanse, and normalize data from multiple sources so our customers receive:

Complete Visibility
Movement provides end to end shipment and order-level visibility across all modes, stitched together with multi-modal ETAs from raw material to consumer door.

Universal Usability
Movement adapts to your unique perspective and needs. With near-infinite configurability and a set of APIs, data is delivered when and where you need it.

Intuitive Interface
With fast search and customizable workspaces, exception management and collaboration tools, Movement's UI simplifies your operations so your teams can focus on what matters.
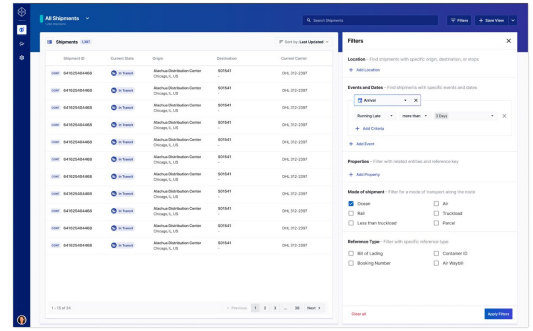

Data Driven
Gain real-time analytics on your supply chain health with intuitive dashboards that make it easy to dig into trends and make better decisions across teams.

Key Movement Capabilities

Whether you experience Movement via UI or API, the platform gives you the tools you need to automate manual processes and collaborate to better serve customers.
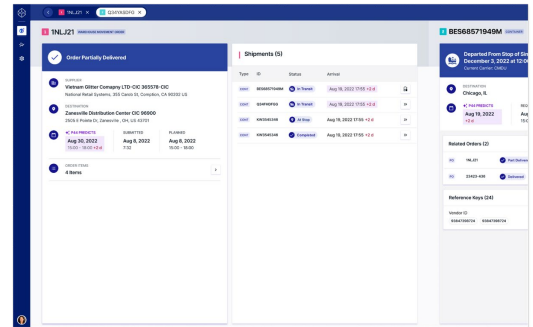

Multimodal Visibility

Track freight against a delivery date and get ahead of ETA delays for all of your shipments, regardless of mode or geography. With all this information in one place, quickly find the information you need and take action in the face of disruptions and delays.

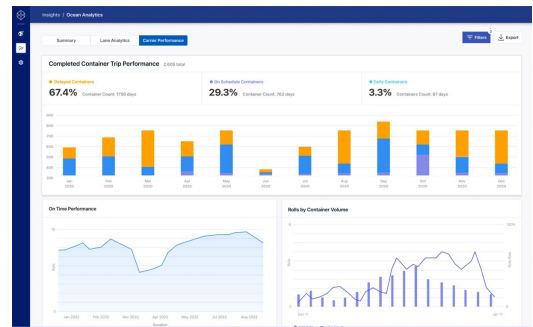

Order Visibility

Movement associates order data with shipments so you can manage exceptions, streamline operations, and collaborate across teams to better serve customers. See and manage goods in transit by the reference that matters to you most, whether it's an order number, bill of lading, or other reference.

Insights

Identify systemic issues affecting your supply chain and solve them at the root. With high fidelity, low latency supply chain data about your network and the larger global supply chain, Movement empowers you to make better strategic decision about routes, carriers, modes, and sustainability.

Partner with the Industry Leader

Our approach to transforming the global supply chain has been validated by customers, analysts, investors and the industry. Our customer experience methodology, *The project44 Experience™*, ensures our customers are live in days, integrated in weeks, seeing ROI in months, and innovating with us for years to come.
